

## **64 PARTICIPANTS ATTENDED SUCCESSFUL MIKE SOFTWARE TRAINING WEEK IN SHANGHAI!**

During the week of March 12-16, DHI China hosted a MIKE 21/3 training course. The training course took place in Shanghai Xuhui Hotel and attracted 64 trainees. From the first day, the trainees were divided into three small classes (2D Water Environment class, 3D Water Environment class, and a Wave class). During the training week, people from scientific research institutions, design companies, and universities of both mainland and Taiwan learned about the 2011 version of MIKE 21 and MIKE 3 software and had a great chance to exchange experiences and make new friends.

### **THE FIFTH DAY OF MIKE SOFTWARE TRAINING – A GREAT SUCCESS!**

On Friday, March 16, the five-day MIKE software training came to a successful ending. During the five days, hydrodynamic engineer Mr. Liu Wenming, Water Environment Engineers Ms. Li Wei, Mr. Wang Fei, and Mr. Li Chihong, as well as Wave Engineer Ms. Zhao Jinjing offered excellent lectures for the 2D Water Environment class, the 3D Water Environment class, and the Wave class on MIKE 21/3 PP HD, Ecolab, AD, BW, SW, etc. They were assisted by a large number of assistant trainers and every trainee was supported by assistant-engineers, who showed great patience and efforts throughout the entire process.

All trainees from the Water Environment class, Mud and Sand class as well as the Wave class learned a lot during the training course. Despite the large differences in the studied fields, the trainees communicated very well, and they have all gained much more than just a few software skills for MIKE 21/3 (2011 Version). Trainees from China mainland and Taiwan all felt precious about this training opportunity and had a photo session at the Shanghai Xuhui Hotel, in order to save this memorable time in Shanghai. Last, but not least, DHI China would like to express their great appreciation to all participants for their
